Antigua
Dear Santa Barbara City Co.

Euphoric effect of volleys across foggy valley. Dark clouds with white & gray & red tones on white morning light against smoke by angry 7 bones of wall.

First view, the ridge with shrub bushes, trees & brown slope, all called in musky, swampy & in fog there with rainmen dripping.

Gates ranmanca walk in fog with lots of pollen plenty shiny days against foggy mudder ridge.

are not over 30 feet in height and are rounded on the edges and generally are oval.

There are no traces of buildings or of cut stones and it is difficult to say whether any of the mounds had buildings.
Guatemala City site
W. H. Holmes, Feb 28, 1895

Here the ancient mounds extend over an area of a square mile or more and 400 structures of varied shapes are in view from a single point. There are doubtless many more beyond the range of vision and hidden in the
Ramirez Clusters, the fields are flat with dark black soil and all is corn now gathered.

The Mounds
The majority are conical and others conical. The highest conical is about 80 feet in height & very steep, this and others having a slope of 45° or more. Most of the conical ones are from 20 to 50 feet in height. The flat mounds
